

# Lesson 77

## Concepts:

Dividing money, correcting errors, money, telling time

## Objectives:

1. The student will be able to estimate long division problems by rounding the divisor and the dividend.
2. The student will be able to complete division problems containing dividends which are dollar amounts.
3. The student will be able to solve long division problems which contain a zero in the quotient.
4. The student will be able to complete division problems with two digit divisors, three and four digit dividends, and two digit quotients.
5. The student will be able to write a specified amount of money in dollar and cent notation when given a picture reference.
6. The student will be able to identify the indicated time, and passing of time, when presented with a clock face.

## Teaching Tips:

A review of rounding might prove helpful before beginning the lesson.

## Materials, Supplies, and Equipment:

1. Multiplication chart or calculator if necessary

## Activities:

1. Read **Lesson 77 Explanation** together.
2. Discuss the sample problems and answer any questions
3. The student should be able to complete **Lesson 77 Practice** independently.

*Do not forget to entertain strangers in need,  
for by doing so some people have entertained angels without knowing it.*  
James 13:2
